Phone: (902) 522-2049 Fax: (902) 522-2309

Construction and Demolition Sorting Guide

1. **Asphalt Shingles** – When collected they need to be on a concrete pad or a pad of shingles. This protects them from being covered in rocks making them easier to chip and more valuable.
2. **Clean Wood** – Brush or any wood that has NOT been treated. Brush should not be sent to landfill*
3. **Treated Wood** – ex: painted, creosote timber, pressure treated, glued, coated*
4. **Clean (new) Gyproc** – Can be used added to your compost
5. **Aggregate** – Rocks, Bricks, Cement (without rebar) rubble, mortar and asphalt
6. **Metals** – Anything without Freon in one pile. Freon needs to be removed from other metals examples include: air conditioners, fridges, water coolers etc.

It is important to remember that garbage generated at a Construction & Demolition (C&D) site ex: caulking tubes, cardboard, insulation bags etc., should be recycled or disposed of properly (and not as part of a Construction & Demolition (C&D) load). As well a good rule of thumb to help classify Construction & Demolition (C&D) waste is: if it was part of a structure it is Construction & Demolition (C&D) waste. If it can be removed from the structure (ex: mirror, rug, cabinets, chairs) it is not classified as Construction & Demolition (C&D).
